

EFDS Inclusive Fitness Initiative: List of accredited suppliers

Nine equipment suppliers out of the fifteen accredited suppliers listed below work collaboratively as our **Research and Development (R&D) Associates**. They work together to develop and approve the IFI Equipment Standards based on product tests carried out by disabled people.

IFI Accredited fitness equipment must meet IFI Equipment Design Standards to be fully inclusive, enabling both disabled and non-disabled people to benefit from a full body, cardiovascular and resistance-based workout.

The IFI Equipment Standards form part of the IFI Mark assessment and facilities must meet minimum standards within their fitness equipment range to gain the accreditation.

As a result of the R&D work there is increased choice of accessible fitness equipment suppliers and their products within the market for leisure operators to choose from. The R&D partnership also supports product innovation amongst fitness equipment suppliers and fair competition for product sales and increased choice of accessible product range for IFI Mark facilities.

[Contact our IFI team](#) if you have any queries about accessible equipment.

List of accredited suppliers
